Forecast for Thursday 29 Sep 2022

Weather: Cloudy start with some patchy light rain or drizzle at first brighter spells more readily appearing late morning and through the afternoon, bringing the chance of a few isolated and light afternoon showers. These die away early evening, while layers of cloud begin to thicken and lower in the west towards midnight.

Chance of cloud-free hill tops above 800m: 30% at first becoming 90% for the afternoon

Low Cloud and visibility: Visibility good or very good becoming moderate or poor in rain, drizzle and showers, also very poor within cloud with bases quite extensive from 600m at first, before largely breaking and lifting above summits from mid-day.

Forecast for Friday 30 Sep 2022
Weather: Area of occasionally heavy rain spreading from the west through the morning, coupled with severe gale to storm force summit winds to bring some potentially hazardous conditions. This clears to the east during the afternoon. With a mix of showers and brighter spells following from the west.

Maximum wind: South 45-50 mph at first with gusts reaching 70mph at times across most exposed ridges and summits, veering to the west and easing from late afternoon.

Chance of cloud-free hill tops above 800m: Becoming as the area of rain spreads from the west during the morning 10-20%, then improving during the afternoon 60% in west 90% in east

Low Cloud and visibility: Visibility becoming as the area of rain spreads from the west during the morning mainly moderate or poor under the cloud, poor within with bases quite extensive down to 600m, improving mainly good in the afternoon.

Temperature: **Glens:** Plus 6 Celsius
At 800m: Plus 16 Celsius
Freezing level: Above all summits
